Sure, I'm not familiar with how it should be, please go ahead and try to tweak it so it looks like its supposed to.

Good Morning Mike,

Usually, once the EI status changes from HENC to HEUC, the Human Exposure Pathway Description is no longer editable. It will gray-out that tab. I can try to trick it (by changing it back to HENC), but it will certainly get logged in the report (SCAP15e) that there was a change, and HQ will know. Maybe if it's just a day, they'll figure out that we went back to make some tweaks. Do you still want me to proceed with this idea? Please let me know.

Thanks,
Kevin

HI Kevin,

I can't find the link to update EPA websites. Can you do it? And delete the paragraph in the screenshot below I crossed out in red?
