Does anyone know what "consistent with the lease agreement" means in practical terms? The lease between the NGS owners and the Nation for the land? Or the coal lease? or some other lease?

Just to help frame our discussion:

The TWG Agreement says "The current NGS Co-Tenants shall cease their operation of conventional coal-fired generation at NGS no later than December 22, 2044. At its election, consistent with the Lease Amendment, the Navajo Nation may continue plant operation at NGS after December 22, 2044 consistent with EPA approval."
