Subject: Re: Benton Harbor work

Thanks for the email Darren,

I'm adding in our new Drinking Water Investigation Unit Manager Aaron Ward.

We are excited to work with you all on this topic. Unless there is objection from my team, I believe this would be are core technical team for this effort.

Jerry

Hello JP,

Just to follow up on our call the other day, EPA will have a presence in Benton Harbor at the request of EGLE. I understand the request comes at a very high level and we in ORD have specifically been called out to provide technical assistance. Particles and filter performance have been mentioned as areas of interest. We are developing study plans, etc. in anticipation of the work to get going soon. I have mentioned many times that we are in contact with you and are aware of your efforts in Benton Harbor. I also mentioned the importance of the sharing agreement that EPA needs to sign and I expect now that this will happen this week given all the focus on helping the city. I want to coordinate with your group and collaborate where possible so efforts are not duplicated and we are most efficient at helping the community. I will keep you updated and expect things will unfold quickly for us this week (there are many BH meetings). Let's stay in close contact and hopefully I can get the agreement in place so you can share what you have accomplished in the city so far.

Thanks, Darren
