Gabriele

Attached is a very rough draft my talking points. I focused on what the state regulations is. Not sure what to say about the pipeline because the pipeline is part of the UST system.

We can discuss this on Monday.

Roxanne

Hi Roxanne,

Unfortunately I'm working a short day today and my schedule is booked up. Forwarding along to Gabriela so she can pick this up on Monday when she returns.

Thanks and see you all on Monday,
Alison

I have a rough draft of my talking point and I also added some information on the slide.
Do you have time today to discuss the pipeline?

Hi Thu, Roxanne, and Alejandro,

With the FTAC approaching next week, following up on Gabriela's earlier email asking for any edits to the draft FTAC AOC Draft presentation. The white slides in particular needed DOH input.

Please send any comments by the end of this week, so Gabriela can have adequate time to incorporate and finalize when she returns on Monday.

Thanks,
Alison

Subject: FTAC AOC Draft presentation

Hi Thu, Roxanne, and Alejandro,

Attached are my draft slides for the AOC update at the FTAC meeting. \

You'll see that I took a lot of the original content from Roxanne's May presentation and put it into the attached. I like the blue color for the slides because of the focus of this work on the protection of water. When I thought about the flow of content we want to communicate, I think it would be helpful to have a few slides at the beginning to discuss the role of the DOH UST program in regulating the facility. This would be content that would describe bottom line – how does the program regulate the facility to address releases from the tanks or the pipelines. Anything else you want to share about

the state regulatory program would be good here too in anticipation of question we might get from the FTAC members or public about inspections etc. Feel free to add slides with a white background for the state program.

I reserved the blue background to discuss the AOC work. You'll see how I'm proposing I walk through the current AOC highlights of work products. You'll also see my slide that attempts to clarify the 2037, 2038, and 2045 dates.

I will present the blue background slides. I would hope Roxanne or someone else from DOH would do the white background slides.

I'm punting this to you all for any revisions. I really won't be able to pick this back up for any additional edits until realistically October 26th when I'm back form leave. If you need anything in the interim, feel free to reach out to Alison.
