Subject: Proposed Site Visit, AZP Facility, Moorseboro, NC

Dear Mr. Basilone and Mr. Coop,

The EPA and the NC Department of Environmental Quality (DEQ) would like to schedule a site visit as part of the Initial Site Review (ISR) Work Plan process. This would be the site visit we discussed in the EPA office on October 22, 2019. A follow-up site visit will be conducted after AZP submits the ISR Report.

The dates and times we propose are as follows:

Tuesday, March 10, 2020: EPA and DEQ arrive at the AZP facility at approximately 1:00 PM and walk the site until approximately 5:00 PM.
Wednesday, March 11, 2020: EPA and DEQ arrive at the facility at approximately 8:00 AM and depart early afternoon.

The EPA team will consist of Paula Whiting and John E. Johnston. The NCDEQ team will consist of Brent Burch, Mark Wilkins, Jeff Menzel, Richard Concepcion, and Kim Caulk. Since this will be fact-finding visit to understand the AZP manufacturing process, to see the locations of past and present features, and to discuss the direction of the Initial Site Review, we do not think that an attorney presence is required. We will leave ours in Atlanta.

If the dates and times offered above do not work for you, please advise. If you have any questions or would like additional information please do not hesitate to contact me.

Sincerely yours,

John E. Johnston
