Subject: RE: US EPA/IDEM CCR call

Hello All,
I just wanted to update everyone with some questions IN would like to discuss on our upcoming CCR call tomorrow. IDEM would like to discuss:

1. How is EPA going to regulate legacy ponds. Which ponds will fall into this category. Indiana is currently closing some "legacy ponds" that are not currently regulated under CCR regulations (these ponds do not hold water).
2. Indiana has power plants that stopped producing electricity before CCR rule went into effect but their ponds still hold water therefore they would be classified as the "inactive ponds". How is EPA going to regulate these inactive ponds at the closed power plants?
3. Update on Indiana's CCR rule writing efforts.

We may also have a follow up discussion from the call in early October.

Thanks,

Susan Vescovi
