REGION 3

During the week of February 6, results are expected to come in from the first week of EPA sampling of home wells in Dimock, PA. These results will have to undergo quality assurance and control methodologies. EPA will have a communications plan in place to guide the notification and release of the sampling results once they are ready for release. Details regarding the public release of the data are currently under consideration. Media interest in the Dimock water quality situation remains high.
