- **Maryland**
  - MD MS4 permits submitted: On April 20, 2020, EPA received Pennsylvania Department of Environmental Protection's (PADEP) draft NPDES permit for the Coudersport Area Municipal Authority (CAMA) WWTP for review. In 2017, the WWTP proposed to receive and treat oil and gas wastewater from Epiphany, a centralized waste treatment facility, which caused concerns for Seneca Nation of Indians (SNI) in New York regarding downstream receiving streams' water quality. At the time, EPA Region 3 initiated coordination with Region 2 regarding the proposed permit. In September 2018, a consultation meeting with the tribe was held. In April 2018, CAMA withdrew its permit application for the PADEP NPDES permit. The current draft permit before EPA for review no longer includes the receipt of the oil and gas wastewater. Considering the history of this permit, Region 3 will notify Region 2 of receipt of the draft permit package and will coordinate as warranted. EPA's 30-day comment deadline is May 20, 2020.
