	A
1	
2	ORGANICS LABORATORY QUALIFIERS
3	----------
4	
5	U - Indicates analysis was performed for the compound but it was not detected.
6	The sample quantitation limit is reported.
7	

	A
8	J - Indicates an estimated value, below the quantification limit, but
9	above the method detection limit.
10	
11	N - Indicates presumptive evidence of a compound.
12	
13	B - This flag is used when the analyte is found in the associated blank
14	as well as in the sample.
15	

	A
16	E - This flag identifies compounds whose concentrations exceed the
17	calibration range of the instrument for that specific analysis.
18	
19	P - This flag is used with a target analyte when there is greater than a 25%

	A
20	difference between the results obtained from the primary and confirmation
21	columns for dual column analysis methods (i.e. pesticides, triazines,
22	PCBs, etc). The reported value is the average of the two results.
23	

	A
24	Q - This flag identifies the average of multiple results from
25	multiple analyses, or the average of the averages of dual column
26	analysis methods.
27	
28	_ - (Underline) - The compound is present at the amount reported. No flag.
29	

	A
30	X - Non-target analytes co-elute with compound. Identification unable
31	to be confirmed.
32
