01/11/2017 ①

(b) (6), (b) (7)(C)

- after my visit, Compressed Steel began to check loads from (b) (6), (b) (7)(C)

- one load had glass/trash mixed in w Steel/metal, so Compressed Steel removed only the metal & sent the glass/trash back
  - glass/trash was reweighed
    - % weight was calculated & CS charged the next load for difference
    - not enough to cover difference

- CS now checking each load from (b) (6), (b) (7)(C) but hasn't seen (b) (6), (b) (7)(C) as frequently

- (b) (5)
