Honestly, I'm not sure. I think she wanted to give you and Kelly an update on how we've been approaching these consultations with coordination from OCTEA. We're currently consulting with the Seneca Nation for Roulette & Catalyst Energy. Phil Yeany has the Catalyst permit. I've copied Renee so she might provide a little more clarity.

Kevin:

Thanks for the update. While on the subject . . . do you know what the Agenda items are for the 5/11/2021 Teams Meeting that Renee Bryant scheduled regarding the Tribal Consultation process in this matter ?

Sincerely,

A.J. D'Angelo

Hey A.J.,

I'm still working on the Response to Comments for Seneca Nation. They're pretty technical with multiple "parts" per comment. I should be wrapping it up though by next week. As for the Response to Comments for the public, I have a meeting with HQ and Cadmus today at 10:00. HQ has a contract with Cadmus for the UIC Program and they're encouraging the Regions to use the contract. Cadmus is going to help with our RTC for the public. They'll organize the comments and try to respond to most of the comments. Although, they have said that the Region may need to respond to more technical comments. Hopefully this will expedite the process! We had 40 people comment on the draft permit, with several submissions from a few of the commenters. So it's a big lift and we could definitely use Cadmus's help.

I'll let you know how we're doing with this process. And I will definitely need your assistance for the RTC for the Seneca Nation. I'll send it over as soon as I'm finished responding. Unless you'd like me to share what I have right now? Whatever you feel comfortable with!

Kevin:

Haven't heard from you on this matter in about 6 weeks. I've been crazy busy too . . . so no apologies . . . but you did previously express a desire to get ORC input on the Tribal and Public comment responses that you had then just started to work on when you last communicated w/me.

What's the scoop these days ? Do you still need/want my assistance ?

Please reach out if you need anything. Otherwise, I have plenty of other irons in the fire (so to speak) that can keep me quite busy !

Sincerely,

A.J. D'Angelo

Hi A.J,

We received comments from the Seneca Nation regarding the proposed Roulette injection well. This isn't the way we thought this was going to work (we thought we would give them a presentation and have a back and forth conversation with them). Nevertheless, they submitted comments that I'm starting to respond to this week. I've attached their comments. They are pretty lengthy and technical so it may take some time for me to answer them. Brian Hamilton, the R3 tribal coordinator, told me it would probably be better to respond to the Seneca Nation's comments separately from the general public's comments. In regards to the general public, I have had around 60 people reach out about this permit of which about 28 people actually submitted their

comments. I'll definitely need to start working with you in all these responses but I can take the first attempt at answering them and then run everything by you. Sorry, I should have kept you more up-to-date with what's going on but it's been kind of a whirlwind. I'm just taking it one day at a time ☺

Kevin:

Just wanted to check in to see how the whole Tribal Consultation process is playing out in **Roulette Oil & Gas** . . . and whether the extended general comment period has resulted in numerous additional comments that are above and beyond the typical norm.

Sincerely,

A.J. D'Angelo
