Good morning Dahnish,

We would like to distribute the public comments before the call on Wednesday. It looks like there are only the 5. We just wanted to check if you have received any additional comments.

Thanks,
Tracey

Subject: Re: PBPK Modeling for Chloroprene; Reviewer Selection and Conditional Consent

Hi Tracey – Two more comments came in late this evening. Based on my quick read, I don't see any direct comments on the proposed reviewers. The Louisiana Chemical Association does have a general paragraph on page 9 of their comment on the peer review.

Thanks!

Dahnish

Hi Tracey – You have our support to proceed as outlined below. Will you let us know when you have picked the meeting date officially? We will likely update the website with meeting registration information and the meeting date (see below). We'll also send out a listserv announcement.

Lastly, Denka/Ramboll just submitted to their comments into the docket. See attached file. Again, a quick look seems to indicate Denka/Ramboll doesn't have any comments on the actual peer review candidates.

- Dahnish

Public Meeting: Following the conclusion of the public comment period, Versar will announce the public meeting date based on the availability of the selected external peer reviewers. Information will be posted no later than 30-days prior to the public meeting. Stakeholders will be notified via the IRIS Listserv once a peer review date has been selected. Visit the IRIS webpage for directions on signing up for the IRIS Listserv.

- Meeting Agenda - TBD
- Meeting Date - TBD
- Deadline - General Registration: TBD
- Deadline - Register to Provide Oral Comment: TBD

Thanks Tracey! I'm checking with management. I'll respond this afternoon.

Just FYI, we got one more comment from the community group in Louisiana. The comment hasn't been posted publicly yet, but I grabbed it from the internal website. I did a quick read and did not see anything that impacts the candidate peer reviewers.

Subject: PBPK Modeling for Chloroprene; Reviewer Selection and Conditional Consent

Hi Dahnish and Paul,

As of today, August 24, 2020, we have not received any comments on the interim list of candidates. At this time Versar would like to request EPA's consent conditionally to conduct the peer review with the final nine selected reviewers listed below. Assuming that we get no comments or no comments that challenge any of our final nine selected reviewers, we will request consent officially on **Tuesday, August 25**, to distribute the review materials, charge questions, and instructions to initiate the review.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

After the reviewers have received the review materials and have looked over the materials, we would like to schedule a kick-off teleconference (1-1.25 hours) with EPA and the reviewers during the first week of September to discuss and clarify the charge questions. We will contact the selected reviewers to **propose Thursday, September 3, 2020 2:30 PM-4:00 PM ET for the teleconference; however, we may have to look more broadly at September 1-4 to accommodate the majority of schedules.**

After polling the interim list of candidates for availability, we plan to schedule the 2-day virtual public meeting on **Monday, October 5 and Tuesday, October 6, 2020**.

Subject: RE: PBPK Modeling for Chloroprene

Hi Dahnish,

Correct, the pre-panel teleconference does not involve the public. The PWS states: "A teleconference meeting (i.e., by phone or Skype) should be arranged with the reviewers, to occur one week after they receive the materials to discuss and clarify the charge: allowing sufficient time for the reviewers to have looked over the materials but not gone too far in their evaluation."

Thanks,
Tracey

Hi Dahnish,

We will take those two dates (Oct. 9 & 12) into consideration when scheduling the meeting dates.

Regarding the duration of the teleconference meeting with the reviewers, how much time would EPA like to have to present background and overview of the review to the reviewers?

Thank you for sending the set of public comment along.

Hi Tracey – Your timeline also seems appropriate. Dustin did bring to our attention that Monday, October 12 is a Federal holiday (Columbus Day), so we should avoid this date for the public meeting and if at all possible Friday, October 9. As soon as you have identified a specific date(s), I can hold the time for all the EPA folks.

As for the teleconference, how long are we envisioning the meeting going? I can attempt to hold some time on people's calendars now for early September.

Lastly, I'm attaching the one comment we've received so far. It should hopefully show up on Regulations.Gov later today.

Subject: PBPK Modeling for Chloroprene

Hi Dahnish and Paul,

This is the beginning of the final week of the comment period and we have not received any comments on the interim list of candidates. I was also checking the FRN https://www.regulations.gov/docket?D=EPA-HQ-ORD-2020-0181. It appears that one comment was received; however, there are no comments posted. As you said, people may be waiting to submit comments toward the end of the comment period which is next week.

When the comment period closes on Monday, August 24, and if nothing substantial seems to be coming in, we would like to select the final nine reviewers this week and get EPA's consent conditionally before August 24 and then have consent officially on Tuesday, August 25, to send out the review materials and initiate the review. This is assuming we get no comments or no comments that challenge any of our final nine selected reviewers.

Ex. 5 Deliberative Process (DP)

If the review starts on August 25, we will need plan a kick off teleconference for the reviewers and EPA to discuss and clarify the charge the first week of September. Also we anticipate that the 2-day virtual public meeting will take place early October 2020 (10/5/20-10/16/20). Does EPA anticipate having any conflicts during these timeframes?

Thanks,
Tracey

This is the one that you just circulated this morning, Dahnish, with the comments for the two small corrections I'm suggesting. Yes, there are only 19 questions in this revised version.

Why do we call them 'questions' when none of them are written as questions?

Subject: RE: PBPK Modeling for Chloroprene

Hi Dahnish,

We had been tentatively holding the week of 9/21-25 for the virtual public meeting, and had the key reviewers available. We have been standing by for the past week or two ready to write to the reviewers as soon as the FR was published to inform them and ask them to hold that week for the meeting. With the FR likely to be published around 7/20-24, and the public comment period to run to around 8/24, that will not allow the reviewers enough time to complete their premeeting reviews for a meeting during the week of 9/21-25. We'll now have to inquire again about their availability into the first few weeks of October.

Thanks,

Tracey

Hi Tracey/all – Just wanted to provide an update, there was another round of back and forth with Denka on the documents for the peer review. This has unfortunately slowed us down again. There is a check-in meeting on Monday with senior management ORD on Monday. I'm hoping for a better sense of when I can push the FRN forward for posting by then.

Besides the schedule, are there any other implications to consider with the delayed release? Do we need to circle back with the candidates before posting the FRN? Just wanted to check.

Thanks!

Hi Dahnish,

Thanks for the update and we're keeping an eye out for the FR. We'll be waiting for comments on the candidate reviewers and will likely look to select the final nine reviewers around the end of July, at which time we will get the premeeting review underway. Based on availability information from the candidates, we're still looking at mid-late September for a meeting and we have a couple of windows of opportunity for the two-day meeting.

Hi Dahnish and Paul,

Thank you for the update. We have reviewed the revised FRN and have no additional comments/heartburn. The 30-day comment period will affect the timeline; i.e., initiate the review mid-late July and the meeting is now expected in mid-late Sept (see tentative timeline below). Also we will re-contact the pool of candidates today about this change and hope we don't lose anyone. It could change what names we publish in the FR. We hope to have updated info in the next day or two.

Also, we received the contract modification paperwork from Angie today; thanks!

Hi Tracey – There has been some structural revisions to the FRN that are worth you looking at. Our senior management had a few significant comments:

Ex. 5 Deliberative Process (DP)

We submitted the FRN back to ORD senior management and are awaiting final approval. In the meantime, can you take a look at the revised FRN and let us know if there is any heartburn? I'm really hoping to get the final approval to move forward with the FRN by early next week.

Side note: I am working with Angie to get the modification awarded. I'm hoping you see the final paperwork go through by the end of the week.

Hi Dahnish and Paul,

Just checking in to see if you had any information on when the FRN will be published? I updated the pool of candidates this morning to inform them that their name, affiliation, and expertise would be published (date to be determined) and that we still anticipate beginning the review in early July, with a meeting to be scheduled for mid-late August. Also I didn't see a statement in the draft FRN on how long the comment period is for the list of candidates. Are we still considering 14 days?

Hope all is well,
Thanks!

Subject: RE: Chloroprene Peer Review - Meeting to Discuss FRN & Timeline

IMO, the fact that ~ 20 potential reviewers were first identified, willing but for timing, is good. We wish that scheduling conflicts weren't such an issue, but it can't be helped.

Subject: RE: Chloroprene Peer Review - Meeting to Discuss FRN & Timeline

Thanks for the update Tracey! I've attached the (hopefully) final versions of the FRN and the LoC documents to this email. I did replace the number "18" in the FRN with "candidates" since the pool might go higher than 18. Also, I know we haven't finalized the list of experts for the LoC document, but I'm ok with the text revisions you made. As you get more information on availability, we can update the list again.

Subject: RE: Chloroprene Peer Review - Meeting to Discuss FRN & Timeline

Hi Tracey – I know you all are still reviewing the FRN, but I just wanted to give you a heads up that I moved the "start date" to July 8 in the FRN. This is a safer date for us given that clearance is taking longer than expected for most of our materials right now.

Subject: RE: Chloroprene Peer Review - Meeting to Discuss FRN & Timeline

Hi David/Tracey/Laura – Thank you all for a productive meeting this morning. I've attached slightly revised versions of the chloroprene FRN and the LoC documents based on the conversation we had earlier today. I did add the list of names of the experts and their abbreviated expertise. We will likely need to triple check the names and expertise. Let me know how this looks and if you have any comments on this version.
