Ok. I'll pull the EPA document and Review it as well, and then see if I can locate the registry studies. If not, I'll pull them up next week. After sorting through the new Epi studies.
Pls note I decided (for obvious reasons) to not bring my epa laptop, so I won't be checking work mail while on vacation. So, pls email me here if urgent.
Thx,
Mike

Hi Kris
Just heard from Kris... She clarified she wants a SQ Evaluation (SQE) for any new Epi studies...

Subject: RE: Request for review of epi studies in Chloroprene RFC

You are welcome....I'd like a few days (likely need through the wknd) to go through some of the new epi studies (or at least the reports that lays out the new/er evidence)....to better gauge level of effort to complete something by Sept. So, while I was the sole Epidemiologist involved in the early iterations of this, I wasn't part of the 2018. But, I'd imagine any study evaluations/pgrphs will be fairly straightforward even if we lack protocols for this chemical.
Thx,
Mike

Middle September?. Using the same level of analysis as was used for the 2018 RFC (study evaluation + summary paragraph).... No need to worry about fancy graphical representations

Although his time is limited (due to other high priority projects), Mike Wright (cc'd) is willing to help (Thanks Mike!). Again, given his heavy workload, Mike's efforts may need to be focused/targeted.

Finally, what is the deadline for the review? i.e., By what date would Mike need to complete his efforts?

Thanks again Mike.

Glenn

Barbara – I don't think this will be a huge level of effort – the primary data studies in the supplement are not very strong with respect to design, but we need to describe that.

Clarification: Mike was involved in the prior chloroprene RFC, I can't remember if he was involved in the 2010 IRIS assessment?

Importance: High

Hi Barbara and Glenn,

We have RFC 21005 for Chloroprene IRIS assessment. Denka and Ramboll submitted to EPA number of documents (all attached). Most of work related to the PBPK model. However, one document – Exhibit B (Updated Epidemiological Data and Studies 07152021) – summary of epi studies submitted in support of RFC.

Kris asked me to pass request for review of Denka submission Ex. B (without going very deep in the original studies) to the EpiWG. I was told that Michael Wright was previously involved in Chloroprene IRIS assessment and could have some background information.

Barbara, could you please coordinate this review. We are on the clock for the respond to RFC (120 days total) and count started in July.

Please let us know if you have any questions.

Thanks!

Viktor.
