Duh. That makes much more sense. I was going off of 3 and not thinking of the rounding. My bad.

How about this?

End of August: End of 30 day public comment period on candidate peer reviewers
Early to mid-September: Reviewers are selected, public meeting date identified, and 60-day peer review starts
Mid- to late October: Public meeting is held within 60-day review period; EPA and Ramboll make joint presentation to review panel
Mid- to late November: Final peer review comments are due and EPA receives final peer review report
End of the year: Based on evaluation of peer review report, EPA will have the information needed to reach a decision on the Request for Reconsideration (RFR).

Subject: chloroprene timeline

Jennifer,

Here is our best estimate of timeline for decision making on chloroprene:

End of August: End of 30 day public comment period on candidate peer reviewers
Early to mid-September: Reviewers are selected, public meeting date identified, and 60-day peer review starts
Mid- to late October: Public meeting is held within 60-day review period; EPA and Ramboll make joint presentation to review panel
Mid- to late November: Final peer review comments are due
End of the year: Based on evaluation of peer review report, EPA will have the information needed to reach a decision on the Request for Reconsideration (RFR). The decision would be whether EPA will update the chloroprene assessment or not.

Let me know if you have questions....-k
