Subject: FW: additional 105 grant project/amendment

Hi Alba,

The Air Division approved a special project for CARB to add to their FY19 CAA 105 grant. Attached is their work plan, project description and narrative budget breakdown for this project.

I intend to advise their new grants person to send revised and signed application pages to show the new requested federal amount (increase the old amount by $75k) and revised SF-424A budget pages with the increased budget. Am I missing anything? Any suggestions/recommendations are greatly appreciated. ☺

Thanks!

- Angie

Subject: RE: additional 105 grant project/amendment

Hi Angie,

I just wanted to follow up to check on the status of additional $75K in 105 grant funding and if there is anything else that needs to be done on our end?

Shika, I've included you in this email, because I was told that Mary Hung is no longer in the Federal Unit. We're working with EPA on getting an additional $75K added to the 2019 105 grant in order to extend field work that is currently being conducted in the SJV through early February 2019. I believe the attached word docs are what Mary said she needed from us, but if there is anything else, please let me know.

Thanks,
Jeremy

Subject: additional 105 grant project/amendment

Hi Angie,

Attached is a description of the work to be performed with the additional $75K in 105 grant funding, as well as a budget breakdown. This work falls under Strategic Plan Objective 1.2 in the FY2019 Work Plan for the 105 Grants (attached). Specifically, under the "Refining the current understanding of particulate matter pollution" bullet on page 10 of the work plan. Please let us know if there is anything else you need from us.

Mary, is there anything else you will need from us on CARB's end?

Thanks,
Jeremy
