Product Overview

Southern Ag Kelp Green is an all-natural fertilizer that came from seaweed extract and fish nutrient. Contains enough amount of nutrients and minerals, including nitrogen, phosphate and phosphorous to provide what plants' need to grow healthy. It may be used on all plants such as roses, vines, annuals and perennials, bulbs, bedding plants, vegetables, shrubs, berries, trees, and herbs. The Southern Ag Kelp Green is filled with natural micronutrients, macronutrients, hormones, antioxidants, amino acids, and vitamins, stimulating soil bacteria and keeping plants and turfs in great condition. It is safe to use for lawn and garden applications since it does not burn plants plus, it may be tank-mixed with other products. Easy and convenient to use by simply mixing 2 to 3 ounces for plants, and 6 to 16 ounces for turfs into a gallon of water. It can treat 25 square feet for plants and 1,000 square feet for turf. Avoid using indoors because it has a strong organic aroma. Available in a 32-oz jug that makes up to 16 gallons, covering up to 5,300 square feet.
