Attachments: EPA-HQ-OPP-2018-0053-0053_content.pdf

The attached file seems to be the registered poultry house product. There may be others.

Subject: RE: Link to the PFAS and PQZ, Broflanilide and Inert ingredients

Hi Anwar,

I moved those slides over from the last briefing as a starting point for HED and EFED to work from – but you are not tied to them.

Those PQZ slides were developed for the pending first residential use whereas this briefing will focus more on the pending PQZ import tolerance. Since the focus has shifted, you may want to consider how your slides may be updated to better focus on the new charge. Assuming that HED believes that the data sets for PQZ are protective of any PFAS concerns, I think the goal is for you to design the slides in a way that conveys this.

Thank you!
Debra

Hello Debra. I just took a look through the slides. For PQZ in the human health context, it's essentially what we had before. Are we looking to cut these down or add on to them?

Subject: Link to the PFAS and PQZ, Broflanilide and Inert ingredients

Hi Everyone,

I sent out the link for the skeleton slides in preparation for the upcoming IO briefing on the PFAS and the pesticides PQZ and Broflanilide and the inerts that also meet the PFAS definition. I meant to include a more complete with a message; however, I accidently hit send before I was ready.

Anyway, I have copied the link in this email as well. Please let me know if there are others who need access to the slides that were not included and I can give them access to the files.

We look forward to working with all of you on these issues. Let me know if you have any questions.
Thank you.
Debra
