Re: UniFirst Corporation, Woburn, Massachusetts

Dear Ms. Newman:

Enclosed is a summary table that includes the latest round of analyses from on-site and off-site wells that have been installed by UniFirst. This updated table includes information from two newly installed Solinst devices at Well UC-11 and UC-12. UC-11 is adjacent to EPA Well 63 and UC-12 is adjacent to EPA Well S-69.

Please call me should you have any questions regarding these data.

Sincerely,

Jeffrey T. Lawson, P.G.
Senior Program Manager

NOTES:

1. ND = Not detected
   - = Not reported
2. The field and shipping blanks for 6/6/87, 6/15/87, 8/26/87, and 8/27/87 contained no detectable concentrations of VOCs. The field blank and several samples taken on 2/3/87 contained methylene chloride. The shipping blank prepared on 2/2/87 and that accompanying the 2/3/87 sample vials contained no detectable concentrations of VOCs.
3. The detection limits vary substantially among the parameters analyzed for and the samples. Refer to the laboratory data sheets for specific detection limits.
4. The field and shipping blanks for 12/1/87, 12/21/87, and 12/22/87 contained no detectable concentrations of VOCs.
