The Administrator's Office delegated this meeting request with the tech company RTI-SAS to Michal. Based on the attached background, they work on PFAS sample collection and lab analysis and Michal is wondering if there's an OPP container angle (see her email below). If so, would you like to attend once it's scheduled? OPPT will be invited as well.

Darlene,

Does OPP have an equity in the topics that RTI and SAS would like to discuss in this meeting (materials attached)? Maybe there's a nexus with the PFAS in containers issue? Please let us know.

Thanks!

Jonah

Michal would like to take this meeting which was delegated from the OA. See below. I am not sure the materials apply to our work but OPPT and OPP can confirm that and may also know whether as Michal notes they may have work in our space. Jonah this might also involve containers so please have OPP look at this. Suggest once we have the program inputs that there may be a need to reach out to the requestor to see if they have work relevant to our programs. We should discuss when the time comes. This one though should be scheduled soon.

Also attaching the email connecting us. This is an AO request. I sent the materials to OPPT, and though they look to be more in the OW lane than in ours, perhaps there would be some overlap or other work they also do in this space. Let's go ahead and schedule a meeting whenever OPPT (and maybe there is also an OPP container angle? Up to them) thinks they will have time to have reviewed them.

Hi Michal,

Thanks, again for taking the time to get connected this AM. As I mentioned, RTI and SAS have put forward some concepts on how they think they can be helpful in the Agency's PFAS work. They have had a previous discussion with Chris Frey in ORD as well. I've attached some background material they have shared with me. I'll connect you with my contact over there who has been helping to coordinate the conversations, Will Morgan, in a separate email chain. If you have any questions or concerns that I can assist with, please don't hesitate to let me know.

Best,

John
