Slight change – Proposed Plan was actually issued in 2010 and we consulted prior to its issuance. We consulted again prior to signing the ROD in Sept 2012. Boy it has been a long haul on this one….

Excellent. Here are my suggested annual highlights beyond 2011. I've copied Kevin, Janine, and Beth as they may have suggested edits or additions

2012: Consultation with Shoshone-Bannock Tribes regarding Proposed Plan; Interim Record of Decision Amendment (IRODA) issued in October.

2013: Consultation with Shoshone-Bannock Tribes regarding implementation of the IRODA; Unilateral Administrative Order (UAO) issued to FMC to implement IRODA in June; FMC submitted Groundwater Extraction Zone Hydrogeologic Report Work Plan in July; FMC submitted the Remedial Design Work Plan in August and EPA approved as resubmitted in response to comments in December.

2014: Groundwater Extraction Zone Hydrogeologic Work Plan resubmitted in response to comments and approved by EPA in February; FMC initial submittal of Remedial Action Work Plan (RAWP) for Site-Wide Grading Phase of the Soil Remedy in March; Groundwater Extraction Zone Hydrogeologic Report submitted in August; Gamma Cap Work Plan Addendum submitted in August; RAWP for Site-Wide Grading Phase of the Soil Remedy as revised in response to comments was approved by EPA in September; Site-wide grading phase work begins in September and scheduled to continue until mid-December; EPA approval of 30 percent soil cap design in September and 90 percent design submittal anticipated in December.

2015 (Planned): Continuation of site grading to prepare for soil capping mid-February through July; EPA approval of interim soil remedy cap design and RAWP; EPA approval of interim groundwater

remedy 30 percent RD. Soil cap installation to begin summer-fall.

Also, I've attached the EPA approved Remedial Design Work Plan (approved December 2013). Please add that to the already excellent set of documents on the website. I will plan to also provide a pdf of the Extraction Zone Hydrogeologic Report Work Plan (approved February 2014) and Remedial Action Work Plan for Site-Wide Grading Phase of the Soil Remedy (approved September 2014) soon.

Please call me if you have questions. Thanks.

Subject: Request for update to web page

Jonathan, I'm in the process of updating this page:
http://yosemite.epa.gov/R10/cleanup.nsf/sites/emichaud

You'll see, in the right side column under the contact information, a section called **Cleanup Timeline**.

Jannine sent me new information for the Simplot and Offplant OUs. Would you please send me a brief update for FMC? Currently it states:

> GW Monitoring Report (Spring); RCRA Post Closure Plan Modification (Fall); UAO RCRA Ponds (ongoing); Proposed Plan and Public Meetings (Fall)

Thanks.
k
