All - This is the second of two emails that came from Lee Juan Tyler of the Shoshone Bannock tribe regarding the FMC Superfund site in Idaho. These emails pertain to the response that OSWER and Region 10 were preparing regarding the recent controlled correspondence from the Shoshone Bannock on this issue.

Look up there you can see the some of the metal aka Ferophos, which was later brought out after Astaris, came into the picture, that was dumped on the slag pile late at night which brought out a huge flame, that is mixed with the slag now and qwill that be spread around as well? There was no proper, meaningful consultation, on this proposed spreading of the contaminated hazardous waste, with the 22 or so train cars still buried underneat the slag pile with toxic waste, and RA in R 10 Dennsi McClarrin or Jim Zokan IDEQ wont do a thing? whats is wrong with the Protection of our Environmental Agencies?
