Jonathan,

No problem doing so. Paul's questions are a little more basic than where EPA is at on their comments. For instance Paul feels that the work plan would be easier to implement if FMC used a different insturment to measure the gamma. I know Kevin and Rick suggested something similar earlier on, I just cannot recall why FMC did not go that route. Was hoping Rick had a better memory of it. But I agree, it would be educational for all of us. dt

Let's plan to have questions on EPA's draft comments raised during the teleconference tomorrow with EPA, Tribes, and IDEQ. That will allow us all to benefit from the discussion. The teleconference is scheduled for 10 am PDT (11 am MDT). Thanks.

I can do this later today or tomorrow AM if that would help. Just let me know what works.

Subject: Gamma Cap Discussion

Jonathan,

Is it possible for Rick to have a discussion with Paul Ritter, my reviewer on the Gamma Cap Survey report? Paul has some questions on the report that I am pretty sure Paul's questions have been discussed before, I just don't remember how or if the issue was resolved. Just thinking if they could get together before hand it could make our 9/25 call go quicker and would help us to get more focused comments to you quicker. dt
