R8 GKM Data Flow to Create Field Maps and "Not Sampled Wells"

Through out the day- Cut of time to hand over to process ideally after the last field crew comes in and all the sample info is loaded approximately around 7PM latest

Google Spread Sheet: Populated based on the Google Form which is populated by the call center.

Molly, Data Manager for Scribe Field Samples

Google Spread Sheet exported to Excel

After the Google Spread Sheet is submitted after 7PM- Done once in the evening

Compare data against SCRIBE: Run query to remove all the records from google spread sheet that are in SCRIBE

Megan, SCRIBE Analytical Lead

Stripped down Google Spread Sheet (all sampled wells removed)

After the Google Spread Sheet is submitted after 7PM- Done once in the evening

Geocode utilizing WorldGeocode Services (online) Archive the old one locally- keep track by date

Corey/Marlen (GIS, Data Support)

QA/QCed geocoded feature class

After the QA/QCed feature class is ready after 7PM- Done once in the evening

Push to Enterprise GIS

Corey/Marlen (GIS, Data Support)

Utilize the Enterprise feature class called

"R8GIS.DBO.GOLDKING_RESIDENTIALSAMPLING_NOTSAMPLED"

After the "NotSampled" feature class is pushed out - Done once in the evening or in the morning

Create field maps (Provide to Molly to be distributed to field crew and Ryan)

Corey/Marlen (GIS, Data Support)

Time Frame and Frequency

Steps in the process
