Hi Juliet:

I understand you are looking for the December 9, 2016 Terraphase letter (attached).

As you know, the work is still operating under the March 31, 2015 SSAP as amended by EPA April 25, 2016 letter, and more recently Terraphase's December 9, 2016 letter and EPA's December 30, 2016 letter. Of course the latter two letters address the addition of subsurface samples, supplemental sample locations and a procedure for sampling by vibracore. Given the link between these four docs, I am including all.

Regards, Jeff

Hi Peter & Jeff,
I was having trouble today accessing/downloading the most recent SSAP/QAPP (December 2016?) for Sims Redwood City site. It seemed to need a user ID & password for me that had expired... and now the file seems to have disappeared... please re-submit to me. I apologize for the inconvenience on a Friday afternoon.

Thanks,
Juliet Hannafin

Juliet,
The attached letter provides responses to EPA comments, dated 10/26/2016, on the *Interim Sediment Investigation Results and Proposed Additional Sediment Sampling* for the Sims Metal Management facility in Redwood City, California. We have expanded the proposed sediment investigation in response to EPA comments. The letter includes revised figures showing additional proposed sediment sampling locations.
Please contact me if you have any questions.
Regards,
Peter
