Hi Holly,

Attached is an updated version of the WQS. Please let me know if they are ready to post to the Repository page.

Thanks,
Sophie

Hi Sophie, yes the version of North Dakota's WQS that you attached is the correct, most current version.

I did notice 3 minor editorial changes that should be made by the state (attached) which I'll send to the state's water quality standards coordinator today, but this version is fine to post.

Finally, there is no need to wait for ESA consultation to conclude before updating the repository.

Thanks. If you have any questions, please feel free to call me.

Subject: North Dakota Document Request

Hi Holly,

We're working with Greg Stapleton to update North Dakota's Repository page. We recently received notification of EPA action on the 2018-08 North Dakota 2018 Triennial submission.

In order to update the repository page, we want to confirm that the document attached, which we pulled from the state website, is the correct version of the updated Water Quality Standards. Additionally, I wanted to see whether you would prefer to wait for ESA consultation to conclude before we update the repository.

After I hear from you, I will continue the update accordingly.

Thanks,
Sophie

Submitter: NORTH DAKOTA (Region 8)

Submitted: 8/8/18

Title: North Dakota 2018 Triennial

Update Submission:
https://wata.epa.gov/wata/wata4/index.cfm?submid=11397

Description: Revisions include updating the human health criteria to match EPA's Ambient Water Quality Criteria for the Protection of Human Health for all priority pollutants and the five select non-priority pollutants: barium, chlorophenoxy herbicide (2-4-D), methoxychlor, nitrates and pH adding a narrative "free from" criterion for nutrients adding compliance schedules for achieving standards for permitted dischargers and placing site-specific criteria for the Sheyenne River.
