Subject: Fw: ND DEQ WQS revisions - response to "bubble comment"
Attachments: ND WQS 2020_Complete_Rule_Ammendents_Strikeout_Color_NEW_EPA edits v4.docx

Hi Pete, I just wanted to let you know that while I cc'd Karl on my email to you about your thoughts on EPA Office Water's bubble comments re selenium frequency and duration associated with fish tissue values, the message to Karl keeps bouncing back. I may have an incorrect email address. The one I have is: krockeman@nd.gov).

Thanks,
Holly

Hi Pete, I forgot to ask you and Karl your opinion on EPA Office of Water's "bubble" comments made in Table 1 (to selenium in fish flesh) regarding frequency and duration of fish tissue numbers, and a footnote that should be attached to instantaneous measurement.

Any thoughts?

Dear Holly:

Initial impression “this is good”. I will run it by Karl.

Thanks for all your help.

Pete

Hi Pete, I hope all is well!

I know your plate is full so I'll be brief. Per our conversation on Monday, attached for your review are EPA's recommended revisions to footnote 4 in Table 1 and footnote 17 in Table 2. Please let me know if you have any comments or questions.

Also, I'm putting together a summary of the discussion on Monday with NDDEQ and Office of Water. I'll send it to you once I'm done to make sure I accurately captured the discussion. I intended to send it today, but work keeps getting in the way LOL...

Thanks so much! Talk with you soon.

Holly Wirick
