Subject: RE: 1725 Verona Well Field - Draft 2020 annual monitoring report review

Thank you Dominique. I will get back to you if I have questions after my meeting with EGLE tomorrow. There were several issues when Progressive first submitted the data sheet this year - some data was missing or listed incorrectly. I will check on this with EGLE tomorrow as well.

Best,

Kelly Poulos

Kelly,

Find attached our draft memo reviewing the 2020 Annual report for the Verona Well Field Superfund site, including our comments on the proposed monitoring program for this year.

I am also attaching a summary of differences we observed while comparing the data that was submitted in the past for the site to the data contained in the file "Verona Cumulative WQ Data_through 2020 Highlighted (003).xlsx". We will be happy to reconcile the differences when Progressive indicates what the correct values are.

On the left side is the data from previous submittals and on the right side in green is data from the current "Verona Cumulative WQ Data_through 2020 Highlighted (003).xlsx". The sheet names indicates what are the differences. "LocationType" changes through time for each well and most of the differences are in 2015. For Lab ID's we need to check only where we have differences between lab id numbers. If we have a blank on either side (previous submittal or new data) we can consider that there is no discrepancy. A few values were corrected as indicated in the "sspa" column, they are also included in the list.

Please let me know if you have any questions or need additional information.

Dominique
