Ian,
Okay, we will huddle up in the morning here in Allen and get the workflow to your requirements.
Thanks for your clarification.
Keith

Keith,

The folder set up with us does have data in it currently. We have files pertaining to your site characterization. A joint folder administered by Ex. 4 CBI will not be acceptable for our review process. We have a system in place that allows for us to create a work area that needs to remain internal throughout the review process so that our review teams can deliberate. Please utilize the OneDrive folder that our section chief has arranged for you all to submit your CBI-protected material for us to review.

While Brandon is an integral part of the review team assigned to your project, he is not the only team member. Ken will allow the appropriate team members access to your CBI protected folder so they can review submissions.

I apologize if we did not outline this process efficiently when we last spoke. For now, this is how R6 EPA would like the review process to proceed.

Good Afternoon,

We have not populated the CBI folder with data yet. The link that our administrator, James Wheatly, will be sending out to all on this thread is to a joint folder that we have with Ex. 4 CBI that serves as the current file location to keep data confidential. I 'm sorry for the confusion.
Brandon should be able to accesses the files , Brandon Please advise if you are still unable to login.

Good afternoon,

Regrettably, we are not receiving any file updates from your end. If I understand the chain of communication correctly, Ex. 4 CBI are the ones who are the ones uploading files into the OneDrive folder set up by us at EPA? The folder labeled "CBI LA0005 AR"?

Brandon,

You have not been set up with "permissions" to access the Ex. 4 CBI folder on the OneDrive. I've requested that you have access and it should be ready in about 5 minutes if you want to try it again.

Thank you,

Brenda

Keith/Brenda –

Were you able to confirm that the .png files had been uploaded to the OneDrive folder? We checked again just a bit ago, and they're still not showing up on our end.

Thanks!
Brandon

Brandon,
We loaded the PNG files into the same folder with the tiffs, Ex. 4 CBI ite Characterzation / Appendix C Figures. I checked and they are there so I'm wondering if we have missed a step somewhere. Brenda has been copied and she can confirm on Friday, if the ice has melted. Safety to all!
Keith

You don't often get email from maples.brandon@epa.gov. Learn why this is important

Apologies for the delay in responding. You said the files had been converted from .tiff to .png and re-uploaded? We had Sam check yesterday, and we're not seeing them on our end.

Other than the log images, we don't have any other requests/concerns at this point. We look forward to seeing the rest of the modules submitted to both the GSDT and OneDrive folder and continuing review of your application. If we come across anything for which we need additional information, clarification, etc., we'll definitely reach out.

I've cc'd the other members of my team who will be reviewing your company's application along with Ken, our section chief. Feel free to reach out to all of us if you have any other questions or concerns!

Thank you!

Subject: Site Characterization, Rapides Parish

Good afternoon Brandon,

Quick note to ask if any additional early requests are needed. We have updated the tiff images to the requested png file format. We are diligently working to complete the remaining requirements where submission can be completed. We understand workload and have an internal goal to do our very best to complete accurately and succinctly the requirements for administrative filing. Our sites are focused geographically within Region 6 so our relationship will have significant longevity.
Thanks for all your help and insight.

Keith
