Subject: CA injection wells

Hi Kim,

Sorry for the delay in getting back to you. I wanted to check in with my UIC data manager to confirm the situation with the CalWIMS data. Apparently, we do not have the Class II well data digitized, although the state is working to accomplish that. You may be aware of the recent focus that EPA has had on the CA Class II UIC program, and data management has definitely been flagged as a major issue that the state needs to address.

It sounds like you are in contact with Steve Bohlen, and that is probably the best approach going forward, as he will know the latest status and be in a position to grant access to whatever data they have.

Feel free to give me a call if you have other questions. I'm very interested in the project you described, including the coverage of dw wells in the state.

Regards,

David
