Subject: Oxy (R06-LA-0004) request for additional information

Good afternoon Kelly,

I have attached a letter from EPA Region 6 UIC section chief, Ken Johnson, requesting additional information for your Class VI application as well as an attachment with detailed comments. The information request tool of the GSDT has been down for the past few days… but once it is back up and running, I will drop the letter and attachment in there just to have on record.

This request focuses specifically on a need for additional site-specific data, which could be ascertained through the construction of a stratigraphic test well. According to your application, it seems like this is already in the plans. If constructed to Class VI specifications, this well could potentially be converted to a Class VI monitoring well or even a potential injection site.

If you and your team would like to discuss the EPA's comments please don't hesitate to reach out.

All the best,

Brody P. Friesenhahn
Geologist
