Subject: Updates to CBI Folder

Ian,

We have updated the GCS CBI folder to align with the Cross Walk Folders. Now the CBI folder has Folders 1-9 to align with the numbers for the various Crosswalks. In addition there is an archive folder with the previously submitted materials. The new Folders 1-9 are populated with the latest version of the submission to the GSDT/CBI and any relevant clarification submissions for either the Project Narrative or the AoR and Corrective Action Plan. As such we have added the clarification that you requested for the Artificial Penetrations.

Once you have had a chance to look at the new folder structure, if you have any questions please let us know. We think this will make the evaluation for the R6 UIC team much more efficient. Many thanks.
