Flag: Follow up

These sites are LSRP cases. We have no information on current status beyond what is in the database.

Hi Elizabeth,

I have Duralac and Sherwin Williams both as Steve Kehayes' case from the Office of Brownfield Reuse. He no longer works here so maybe contact Tim Bartle from that office. I will copy him here.

For Duralac, John Doyon is the funding contact and David Morrow was the geologist involved in establishing the Classification Exception Area, but I would still start with Tim.

For Sherwin Williams, some Compliance Assistance is going on with Sharon Bruder in terms of whether or not they are compliant with their deadline for RI completion. Sharon may know more than Tim can glean from our database, so I will copy her here as well.

Janine

Subject: status of investigations/cleanups of Joe Morris' properties

Hi Anne & Janine.
I'm wondering if you might be able to point me to a contact for an update on the investigations/cleanups that were done of the properties adjacent to the Diamond Alkali site as part of Joe Morris' redevelopment of Sherwin Williams and Duralac? I'd like to include a brief blurb in the five-year review.
Thanks,
Elizabeth
