Subject: Location of (Kay's) LOOP Materials

Hi Mark

As follow-up to the LOOP discussion with you on 8/2/17, I am forwarding the info below in case Angela did not pass it along to you.

The information discussed below only pertains to the documents that I am aware of (… in my role as LA Coordinator), *plus* I have additional emails in my Outlook….and other documents since 5/5/17.

The other folks who have been involved would have their own "records" (…with some overlap.)

Next, I will forward you Isaac's initial determination (3/25/14) that WET biomonitoring is needed at Outfall 004. (Disregard the mention of "…similar in nature of produced water…" LOOP disagreed & Isaac then described it differently later on….)

K

Subject: Location of LOOP Materials

Hi Angela,

Per your request, I have "organized" the hard-copy stack-of-LOOP materials that I have collected over time. They are somewhat in chronological order. I placed them in a centralized location for use by all -- on top of the glass-front bookcase across from Maria & Isaac.

(Also, Silvia still has some materials including the "old" studies performed by LOOP sent to us by LDEQ/LOOP, etc. at her cube.)

Also, I have copied all e-files that I have stored on my R: to H: at --

H:\6wq\6WQ-PO\Louisiana DRAFT Permit Reviews\LA0049492 LOOP Deepwater Port Complex_LDEQ and EPA copermittees

(There are many emails that have come & gone which are NOT included in the "stack" or the e-files.)

Let me know if additional info is needed.

Thanks

K
