Subject: RE: LOOP - "introduction" meeting with RA/DRA - Monday, April 2

Rob, I am out until next Tuesday. But I do not think I have any changes previous positions. I would not think this would be anything more than a meeting where the RA and DRA say the Regional staff feel strongly that their a subject to the CAA and CWA jurisdiction and how to establish a path forward for resolving this issue.

Subject: LOOP - "introduction" meeting with RA/DRA - Monday, April 2
Importance: High

The meeting with LOOP is now set for Monday, April 2, in Baton Rouge. Location of the meeting to be determined.

Now we need to provide Anne and David with the latest background information that they will need. I doubt that they are to debate the fine points of NEPA or federal jurisdiction, but we do need to develop the latest information.

Attached are the latest versions of the Air and Water briefing sheets and my "short version" of a summary of key points. But these need to be reviewed and revised immediately. For example, they were written before LOOP's outside counsel alleged that EPA had no jurisdiction for the facility under the Clean Air not the Clean Water acts. And now that everyone is looking at Subpart Y MACT requirements for Marine Terminals with vessel loading operations and LOOP starting loading crude carriers in February (second tanker filled this week), they probably fall

under requirement for their 3 mooring buoys.

Can everyone get back to me by NOON tomorrow (Thursday, March 29) with suggested edits using redline/strike? Sorry for the short fuse.

Rob Lawrence
