SO, does this mine I should start recalling material back for LA0049492 LOOP

Looks like there is material shipped to storage from 2003 to 2015.

Let me know and I will start my process. Thank you Gail.

Isaac,

Ok, thanks. An official file will need to be made/set up for the ongoing permit reissuance for the official administrative record. Gail volunteered to help ☺

Thanks

K

Hi Isaac,

There is more ☺

Late yesterday I sent the partial of what I have download from EDMS and typed up as of yesterday afternoon…. for Taim's upcoming briefing today

Today I am trying to find some of the permit modifications that appear to have occurred.

Do you have a file on LOOP from the 11th Floor Filer Room? I checked with Gail the other day and it appears that ALL permit info regarding LOOP (federal and state outfalls) was transferred to LDEQ when the program was delegated (1990's) ….but that does not explain why EPA did not set up an official file record when EPA issued its first "joint permit" in 2003, then permit modifications and the reissuance in 2008 (i.e., the current existing permit)??

Any info that you may have would be helpful.

Thanks

K

Kay,

Thank you very much for putting these together. It looks like that the Outfall 004 effluent limitations have not been changed. Not sure if we need to add the 2018 proposed permit conditions in this summary? Thanks again.

Isaac
