Attachments: Summary of Technical Sub-Group Discussions -Transboundary Monitoring Task Group.docx; 2019-05-01 Koocanusa Sampling Program 2019 DRAFT.docx

Morning, following up on the action items from the April 4 meeting (minutes attached for reference).

- #1 – please find attached summary table of activities for Koocanusa Reservoir in 2019 – any further comments please let me know
- #2 – logistics planning continues and on track for May 14/15 sampling at Rexford, thanks Trevor for information
- #3 and #4 – this has been shipped and confirmed at Libby Dam with additional spares – thanks Greg for confirmation

Regards, Nigel

Subject: RE: Meeting summary - April Technical Call - Transboundary Monitoring

[External email]

Hi again everyone,

It has been suggested that the broader task group would benefit more from a separate summary of our sub-group's discussion rather than sharing the full meeting notes.
Please find attached a summary that I intend to share with the task group, along with the updated matrix document and US-ACE's 2019 sampling plan, when I send out the doodle polls.

Please let me know by Wednesday April 10 if you have any changes, comments or concerns with the attached. I hope I've captured everything accurately.

Thanks and have a great weekend,

Mich

Subject: Meeting summary - April Technical Call - Transboundary Monitoring

Hi everyone,

Please find attached a brief summary of today's discussion, along with the legacy notes from previous meetings. Includes a table noting the remaining items to be addressed.

Let me know if you have any suggested changes to the notes.

Would you all be comfortable if I share this document with the broader task group for their information/awareness?

Doodle polls to follow,
Mich
