Subject: FW: Accomplishment Topics for Rick's Town Hall Presentation on Monday

Please send me a couple of sentences (and/or edits) for the following Q1 and 2 accomplishments by 1 pm today:

- ESA – **Released the first ever nationwide final biological evaluations for chlorpyrifos, diazinon, and malathion based on interim methods developed collaboratively with the Services in response to recommendations from the National Academy of Sciences. Continued to develop tools that automate methods for evaluating the risks of pesticides to endangered species including a movement toward probabilistic output.**

- Synergy – **Kimberly**

- EFED Created a division-wide SOP for the successful onboarding of new hires. On-boarded **5** permanent and **2** term employees and **1** part-time pathway student

- and **Training – Kimberly**

- **Pollinator Activities:**

- Completed draft pollinator-only risk assessment for thiomethoxam, dinotefuran and clothianidin including new bee bread methodology to address the pollen route of exposure

- Hosted non-Apis exposure scientific workshop in January 2017 with experts from regulatory agencies, academia and industry. The outcome from the workshop will inform our evaluation of the current risk assessment framework for pollinators and its applicability to non-Apis species.

- Released final acute risk mitigation strategy which includes risk-based restrictions for products that present an acute risk to honey bees when they are most likely to be exposed (i.e., while performing pollination services) and the continued support of state and tribal pollinator

protection plans.

- Implemented full pollinator risk assessment methodologies for a new chemical, cyclaniliprole, including tier II, tier III, RT25, and translocation studies, which led to a well-informed risk mitigation/risk management package

Agreed. Definitely ESA and a plug for the EFED training. Also consider the efforts related to synergy.

Hi Everyone,

We're preparing Rick's talking points for the Town Hall Meeting on Monday and he asked me to check with you to see if you have 1-2 accomplishments for this FY that you would like him to highlight during the meeting.

If so, please provide a short sentence or two about the issue. We would appreciated having this by 2:00 pm tomorrow as Rick will be out of the office on Friday. Thanks for your assistance.
