That looks reasonable to me Chuck. I think you/we might end up on a follow up call with him to clarify some things, but this is good to lay it out there for him to think about what they want to do.

Thanks!

Colleen

Hi guys,

Below is a draft email I'm putting together for George. Let me know what you think.

Chuck

Hi George,

So I talked with Jen and Colleen about the Open Space Developed overlap for chlorpyrifos and malathion. For chlorpyrifos this CDL category was used to evaluate non-golf course turf and for malathion it is used for shade trees.

Ex. 5 - Deliberative Process

I'm not sure how much the proposed changes will impact your results. Let me know if this is something you'd like us to revise now or at a later time between the draft and final BiOps.

I concur!

Wednesday works, although if the ESA steering committee is cancelled tomorrow (which I am betting it will be) we all have tomorrow at 2 available.
