Subject: RE: Taminco US LLC - submittal of comments for Chlormequat Chloride

Hi Jessica, thanks for your note. The purpose of the CDX portal is for managing and responding to Data Call In (DCI) issuances which is a different process than submitting public comments. The proper way to submit a comment on a chemical open for registration review is to locate the docket number referenced in that review case's federal register notice announcement on www.regulations.gov and submit comments through that website. Please use this method to provide comment on any work plans, risk assessments, or other case documents you might review in the future. Additionally, when it is time to use CDX to respond to a DCI, you will receive an email prompting a response from the CDX system.

The public comment period is now closed and you won't be able to submit comments online at this time, but I'll make sure that the comment you've sent me is reviewed and considered for the chlormequat chloride final work plan. I hope this helps.

Have a great day!

Jordan Page

Subject: Taminco US LLC - submittal of comments for Chlormequat Chloride
Importance: High

Hello Mr. Page,

I am the US regulatory representative for Taminco US LLC. I recently tried to submit comments during the open comment period for chlormequat chloride through CDX and I must have made a mistake because my comments were not submitted properly. I am new to using CDX and just realized what had happened. I would greatly appreciate the opportunity to submit my comments for chlormequat chloride because my company has an interest in pursuing a registration using this active ingredient in the near future. Therefore, the data requirements directly impact our business. I have attached our comments and again ask that these be accepted for consideration. Please let me know if this is acceptable and if I need to do any further work to get this submitted.

Regards,
Jessica McLaughlin
