Subject: RE: Letter from Gibson, Schumer and Gillbrand to CDC and NIH, Re: Federal Support for Addressing POFA Contamination in Hoosick Falls and Petersburgh

The Congressional letter says that 2.08 ppb of PFOA in blood "is considered the safe limit." That's not accurate. Correct me if I'm wrong, Mark and Pat, but the fed. gov't has never stated what blood serum level of PFOA is safe or unsafe. 2.08 ppb is just the median concentration of PFOA in blood serum in the US population, based on the most recent NHANES data.
