Subject: PID/ID Program Review - Next Thursday 9/24

Hi all,

Program review for the Q4 PIDs and IDs is coming up next **Thursday, September 24th**.

Please take a moment to review the final version of the program review/FRN document, and **reach out to your chemical teams to discuss who will present which portions of the fact sheet**. In addition, please take a look art the attached document and let me know **if there are any major changes/updates that need to be made, or if any chemicals need to be taken out of the presentation for any reason** (didn't get finished in time for the quarter, were published as part of a separate FRN, etc.)

The logistics of the presentation will be the same as July's program review, except **we are only presenting PIDs/IDs this time around**. I will present the program review/FRN document on my screen and navigate through the document. I will announce each chemical and introduce the CRM, and CRMs/teams will present the factsheet.

I encourage presenters to show video during your presentation – this is an excellent opportunity for (virtual) facetime with the office director and division directors.

Please let me know if you have any questions or concerns.

Thanks,
Marianne
