Subject: Urgent call to continue current funding the EPA

Dear Mr Puitt,

I'm writing you in order to urge you to continue funding the EPA and not to make any cuts to the organization. The work it does is very important in helping protect our environment. Through this, we breathe better air and less harmful chemicals enter into our bodies.
This also helps the general American public and not just the corporations who many times take advantage of the environment in order to gain a few more dollars.
Please help ensure the strength of this organization and keep funding at current or higher levels, especially as it provides for the entire American people much more than the small amount of the National budget it uses.

I hope you make the right decision.

-David
