State and Tribal Items:

WI requests info from JCI/Tyco on deep wells: On Aug. 19, Johnson Controls, Inc. and Tyco Fire Products LP (JCI/Tyco) announced that the residents in its potable well sampling area have the opportunity to have JCI/Tyco install a new deep well on their property to serve as the resident's private drinking water supply. While the WDNR preferred alternative for safe drinking water for residents in the potable well sampling area is a public water supply, they recognize the need to be responsive to residents' preferences, including those who prefer deep wells. In a letter issued Sept. 8, WDNR requested that JCI/Tyco provide an explanation how the deep wells are designed to be protective of human health and the environment, and to document the plan for monitoring after the wells are installed.
