Attachments: ANALYTIC VARIABLE LIST.pdf

Barbara and all,

Here is a listing of the variables and a brief description from our analytic dataset. I think that it's relatively self-explanatory. All exposures are linked to a specific job (1-131) and there are start and end dates for each job. If there are any questions, I'm happy to discuss them.

Best wishes in the New Year,

Laura

Subject: follow-up regarding further analyses

Hi Laura,
We have continued to discuss how best to support our unit risk calculations and there may be some additional analyses that will add value for the assessment. In order to understand what might be possible, we are interested to know the variables that are available for the individuals in your dataset for the industrial cohort. Would it be possible for you to share a data dictionary with us?

Thank you very much for your willingness to continue to assist us as we work through the details.
Sincerely, Barbara Glenn
