Andrew,

Ex. 5 Deliberative Process (DP) I had previously reviewed the 1992 study for whomever is working on the irritation section.

Exposure Quality-FA.docx

Happy Monday, John! (I know you are compressed today- Friday)

Sorry, I meant to call you yesterday, but was "in the zone" on my revisions.

Ex. 5 Deliberative Process (DP)

Whenever you get the chance.

Maybe we can chat on Monday or Tuesday?

Thanks again,
Andrew

Thank you for sharing your table with me. I think I will share it with Brian so he can see the latest-and-greatest way to do a study quality table. We still need to revise ours to the new format.

We can meet to discuss citations anytime. When it is convenient for you, give me a call.

John

Sure, or we can wait until after the rush to finish our sections is over, either way is fine with me... Attached is my most recent controlled-exposure table, but I am still going through the animal text section (although I don't anticipate changing any decisions).

Andrew,

I will review these 2 studies this morning. As for doublechecking the references in my table, it might be best if we sit down and see if we are citing the same papers. I am free all afternoon today, but I am compressed tomorrow.

John

Hi John,

I am not sure if you have looked at these two controlled exposure studies, but I am adding them to my section and was hoping you could take a look? One I have already excluded in the study quality evaluation.

I was also thinking that we will need to doublecheck that the references in your table reflect the studies cited in the draft and vice versa (at some later point, of course).

Thanks!
Andrew
