Subject: Review of Dose-response section (and some overall comments) by Karen
Attachments: Comments on June 2103 draft Formaldehyde TR HOGAN.docx; Comments on June 2103 draft Formaldehyde TR Cancer dose-response KH.docx; FormaldehydeTRdraft070113forREVIEWkh_8-5.docx

Hello team,

Karen has provided a number of insightful comments on the TR, particularly the dose-response section. Thanks, Karen!

These are shared in the 3 attached documents. Two are comments documents (the one ending in HOGAN includes comments primarily on the noncancer dose-response section as well as some general comments; the one ending in KH is primarily on the cancer dose-response section), and the third document includes markups/ bubbles in the draft (mostly regarding the noncancer dose-response section).

I know it is short notice, but as individual section authors will need to take a look and incorporate changes, we could try and discuss any overarching issues she identified at tomorrow's team meeting. If you notice (before tomorrow around lunch) any issues you would like to raise, please let me know and we can keep the meeting. Otherwise, we will cancel tomorrow's team meeting, and we can put these comments on the schedule for next week.

We will be having our meeting scheduled for this Thursday. We will be discussing how to best present our "integrated summaries" and "weight-of-evidence" analyses. We can also provide the team with a summary of recent developments. Barbara will be bringing free paperclips.

Best,
-Barbara and Andrew
