Attachments: Formaldehyde Appendices 110617.docx

Sorry. Here is the document. There are 5 appendices.

Sorry, it did not answer my question. How many appendices are there since I could not tell by looking at the TOC in the main document.

As changes have been made to the main document, we have taken the effort to maintain consistency of content in the appendices.

Hi Barbara,

How many appendices are there? I could not tell from the main document which itself is a large document and I can imagine the efforts needed for consistency is going to be huge.

I don't think the appendices are terribly inconsistent with the main document. There are a lot of tables and figures that need better formatting. The literature search section needs updating, i.e., numbers etc. Depending on our other priorities, it might take between 2 and 4 months - this is a big guess.

Barbar, Santhini and Andrew,

Thanks

We might be able to tech edit Appendices during Agency review if they were at least consistent with main document.

So, it would be useful to roughly estimate:

1) How long might it take to at least get them substantively consistent with any revisions in the main document?

2) How long might it take to have totally clean appendices if we get as far as public release?

David

The main document has a number of comments and there are references that need to be added to HERO. The reference management and other comments would need to be addressed prior to sending up the chain.
