Eyeballing this, our work area should be outside of the wetlands area in locations where fill material was brought in. We should be fine as long as we doing go crazy clearing more than we need to.

> No word from state. I just wanted to have get ahead of it and have some awareness. We won't be doing any excavation in the wooded area during this phase anyone. However, we will be clearing areas for our trailers closer to the parking lot/Weber border preferably. Also, the Buffalo Niagara Riverkeeper rep is working side by side with Weber in the transfer of the property to the Town of Niagara. He will also be around next week by my invitation to get an understanding on what our ground vegetation clearing entails on Staging Area #1 and how it may affect the Weber property…hopefully, temporarily.

If you are really concerned about encroachment a wetlands survey would need to be completed to identify the boundary in the field. I'm assuming that the state has been looking at what we are doing. Did anybody from the state bring it up?

Hi Peter:

Do we have Wetlands identified at NFB Site? I thought you looked into that but cannot find.
Thanks

Regards,

Eric
