I am outraged by the president's decision to scrap the climate change agreement.

What's wrong with this man: he states we're going to get out then we're going to negotiate. What the hell?

These kinds of decisions reflect a man who is incapable and incompetent to run this country. He doesn't have a clue to what he's doing.

The EPA needs to step up and get smart and move past these ignorant decisions. Our country is in serious trouble and the world is laughing at us.
