Mike, the links I sent you this morning for some reason directed the user to EPA remoteworkplaceblahblah. Use the attachments here instead, one is for PROS and the other is for Triclosan.

How bizarre, but I think I know what may have happened. Jace wrote the original e-mail and probably created the individual links himself while working from remote workplace. You've probably noticed that just about any link you click on while on remote workplace has a very long "remoteworkplace" blah blah blah prefix in the URL. I hate this feature, but I guess it's all in the name of security. Anything we click on has to go through cyber RTP or cyber Ohio before it actually bounces back to our computer.

Funny thing… if you use remote workplace (at home, on travel, or in office) these links work as intended. I was working at home yesterday when I got them.

The URL for Canada's FEQGs is

http://www.chemicalsubstanceschimiques.gc.ca/fact-fait/feqg-recommand-eng.php

but I'll also go ahead and attached those four below. If you are interested in others, you'll have to go to their website.

Hope this all helps

Phil

Hi Phil, first off thanks for forwarding this along. However, wen I click on the individual constituents it takes me to EPA remote workplace rather than the resource. I don't understand the linkage. Do you know why?

Thanks Jace! Good to know.

I'm forwarding this on to the ERAF tri-chairs (and Phil Turner) and OHHRRAFF tri-chairs for distribution if they deem appropriate.

Cheers, Chuck

Dale – Good afternoon/evening. Hope all's well and you're enjoying 2017.

Alerting you that Canada recently proposed Federal Environmental Quality Guidelines for **four** constituents, including perfluorooctane sulfonate (PFOS), hexavalent chromium, bisphenol A and triclosan (hyperlinks embedded). Relative to **PFOS**, values are included for surface water, fish tissue, wildlife diet, bird egg, soil and groundwater.

Reply/call with follow-up questions otherwise, thanks in advance and best wishes. ~~~ Jace (AWL# 703-330-6775)

P.S. Apologies if my email is duplicative.
